DETAILED ACTION

1. The Amendment filed on 6/17/04 has been entered.
2. The drawings were received on 6/17/04. These drawings are approved.

Continued Examination Under 37 CFR 1.114

3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/17/04 has been entered.

Election/Restrictions

4. Claims 10-14 and 22-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group and Species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10. Moreover, claim 35 has been withdrawn since the elected species does not include this feature.

Thus, claims 1-9, 15-21, 32 and 34 remain for consideration on the merits. With regards to claims 8, 9 and 33, they have been withdrawn from consideration for the following reason.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, 8, 9, 15-21, 32, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Molzberger et al (EP 1 048 257 A2).

Molzberger et al discloses a hygiene roll dispenser, i.e. wipes, comprising all the elements claimed including, inter alia, a cartridge (e.g. 2) comprising a bottom wall (at 3 in the Figures), at least one side wall (e.g. 4, 5, 6), a chamber (e.g. surrounding 15 in Fig. 2), and an opening (near 20 in Figs. 4-5); a cover (e.g. 1); an elongated dispensing passage (between 20 and 25 in Fig. 5); a rib (bend or juncture adjacent 21 in Fig. 5); and a lip (e.g. at 29). Figs. 1-10.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under

37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Molzberger et al (EP 1 048 257 A2) in view of Ishikawa et al (US 5,699,912).

Molzberger et al discloses the invention substantially as claimed except for the cover providing at least a double seal about the perimeter of the lip except at the elongated dispensing passage. In that regard, Ishikawa et al teaches a container for wetted tissues, i.e. wet wipes, in which the cover (33) provides a double seal about the perimeter of the lip (12) vis-a-vis the portion of the cover over the lip and the projection (34b) which performs at least the dual functions of locking the cover to the cartridge in an enhanced manner (10) and inherently preventing undue or excessive evaporation of the moisture in the wet wipes. See e.g., Fig. 3B, c. 4, ll. 42-55. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the cover of Molzberger et al with a double seal about the perimeter of the lip as taught and suggested by Ishikawa et al in order to facilitate enhanced locking and sealing of the cover to the cartridge to thereby prevent excessive or undue moisture evaporation of the wet wipes as well as insuring the hygienic dispensing.

In light of the modification of above, it is deemed obvious to the ordinary artisan that the modified device of Molzberger et al would not have the double seal at the location of the elongated passage, since if the features comprising the double seal were

Art Unit: 3724

to obstruct the elongated passage in the modified device of Molzberger et al, they would prevent dispensing of the wet wipes through said passage.

Response to Arguments

10. Applicant's arguments with respect to claims 1-9, 15-21, 32 and 34 have been considered but are moot in view of the new ground(s) of rejection.
